Design For Seagate SOP 39 Training
Oct 23 – 25, 2012
Hosted By Seagate at Their
Penang Malaysia Facility

The most cost-effective way to satisfy Seagate's SOP39 requirement is to design for compliance. Redesign to meet these requirements is both very costly and highly inefficient. In accordance with these basic needs, Salus Engineering International is offering its Design For SOP39 Compliance Training. The essential topics to be covered include the following:

- Electrical
- Interlocks
- Emergency Off
- Mechanical Hazards
- Robotics
- Ergonomics
- Energy Conservation
- Chemical Hazards
- Ventilation
- Liquid Heating Systems
- Radiation
- Lasers

The training will be focused on practical applications with numerous examples and workshop style exercises. Training will be conducted by:

Chris Evanston, P.E. and John Visty, CIH

Total Cost for all three days of training is $300 (US Dollars)
